Sarasota, FL

New College of Florida Aug. 2007 — May 2011

Early admission in lieu of 4th year high schoolHarriet L. Wilkes Honors College
Sep. 2006 — May 2007

Academic Projects

Modeling Hospital Patient Trajectories

Sarasota, FL

Florence A. Rothman Institute

Au. 2018 — Now

I am studying the interactions of chronic conditions with heart failure using clustering and finite state modeling.

Automated Tracing of Neurons

Seatle, WA

Allen Institute for Brain Science

June 2018 — Aug. 2018

Implemented proof of concept for automatically tracing brain cell morphologies using deep reinforcement learning.

Multisensory Integration in Mosquitos

Seatle, WA

Fairhall Lab, University of Washington

Oct. 2014 — May 2016

I created agent-based dynamical models of mosquito thermal plume navigation using wind-tunnel flight data.

Humpback Whale Census

James Price Point, Australia

Kimberley Community Whale Research Project

Aug. 2012 — Oct. 2012

A community-initiated peer-review of a study conducted by an oil conglomerate at the proposed site of the world's second-largest liquefied gas processing port. Our research revealed gross discrepancies in the original study.

Honors Baccalaureate Thesis

Sarasota, FL

Walstrom Lab, New College of Florida

Aug. 2010 — May 2011

My capstone thesis project proposes a model for RNA Helicase A function in endogenous *C. elegans* RNAi pathways based on qRT-PCR experiments.

Independent Tutorials

New College of Florida

Sarasota, FL Aug. 2007 — May 2011

I created courses with faculty supervision using New College's tutorial system. Highlights: "Quantitative RT-PCR", "Floridian Invasive Species", and "Synthesis of P450-like Complex".

Genomics Outreach for Minorities Project (NSF-REU)

Seattle, WA

Pallanck Lab, University of Washington

May 2010 — Aug. 2010

I helped establish a method to grow, stain, and image primary dopaminergic neural culture from *Drosophila* embryos in order to test whether Parkin and PINK1, proteins involved in Parkinson's disease, are recruited to depolarized mitochondria in dopaminergic neurons. This research was published in *PNAS*.

Organic Synthesis of P450-like Molecule

Sarasota, FL

Scudder Lab, New College of Florida

Sep. 2008 — Nov. 2009

I partially synthesized precursors to a novel high-valent iron-stabilizing macrocycle based on the active site of cytochrome P450.

Summer Undergraduate Research Program (NSF-REU)

Pittsburgh, PA

McCartney Lab, Carnegie Mellon University

May 2009 — Aug. 2009

I determined that APC2, a protein with probable roles in colon cancer tumorogenesis, did not interact with β -catenin of the Wnt pathway's destruction complex. I determined that APC2's conserved N-terminal domain was not essential for its proper localization. This research was published in *Genetics*.

GC and HPLC Instrumental Analysis

Sarasota, FL

McCord Lab, New College of Florida

Jan. 2008

An independent study project where I learned how to operate liquid chromatographs and analyze their spectra.
